

Pathway to Excellence®

ANCC International

Contact: **ancc.international-europe@ana.org**

BACKGROUND:

The American Nursing Credentialing Center (ANCC) Pathway to Excellence® is a framework designed to cultivate a thriving work environment and elevate nursing practice. By keeping its employees at the forefront, the framework offers an evidence-based solution to the most pressing challenges such as increasing clinician burnout, turnover and shortage that healthcare organizations are facing.

By embarking on this nursing excellence journey, organizations demonstrate their commitment to creating a workplace that values the contribution and safeguards the well-being of nurses and their healthcare team. Creating this type of environment increases job satisfaction, employee engagement, loyalty, fulfillment in work, translating into enhanced care quality, operational excellence and organizational outcomes.

Pathway is NOT just a nursing credential: It's a CULTURE STRATEGY that results in organization-wide transformation. Leaders of Pathway-designated organizations have reported that their Pathway journey has significantly enhanced their work culture, collaborative practices, nursing professional competence, perception of their work environment, leading to employee retention, higher patient ratings and willingness to recommend the hospital.

VALUE PROPOSITION

Beneficiaries	Competitive Advantage	Value
Organizations	Leader in Nursing and Midwifery Workplace Excellence	Demonstrate dedication to nursing and midwifery excellence and fostering a healthy work environment that puts people, the most important asset of the organization, first. Achieving the designation is validation from ANCC International and the nursing workforce that they work in an organization that's a great place to work.
	Recruitment and Retention	Foster an environment that values nurses and midwives' contributions and prioritizes their well-being, helping them identify their professional home and choose to stay, thereby enhancing staff retention.[1,2]
	Quality of Care	Implement an evidence-based model that actively engages the nurses and midwives in continuous improvement to achieve higher standards of care and sustained superior organizational outcomes.
	Operational Excellence	Enhance teamwork and operational efficiency through interprofessional shared decision-making and principles of leadership development
Nurses	Professional Development	Provide nurses with opportunities for lifelong learning, mentoring, and career advancement to enhance their skills and job satisfaction.
	Work Environment	Cultivate a respectful, safe, and inclusive workplace free from incivility and violence.[3] Fosters an environment that gives nurses and midwives a voice, invites their input, celebrates their contributions, nurtures their professional development and well-being. Given the pivotal role nurse managers play in creating supportive work environments, strategies to strengthen their leadership competencies are essential, along with measures to support their well-being, enabling them to effectively care for their teams.
	Empowerment & Engagement	Give nurses a voice by involving them in the decision-making process, which enhances their engagement[4] and commitment to their roles.
Patients	Quality of Care	Enhanced interprofessional collaboration, teamwork, and job satisfaction, along with a sense of fulfillment in their roles, lead to an improved patient experience and higher quality of care.[5]
	Safety and Well-being	Nurses have input into decisions that impact their practice which improve patient safety, minimize errors, boost overall patient satisfaction, quality of care and outcomes.
